

TEN-PAGE TEST DOCUMENT

Sample PDF for rendering, extraction, pagination, tables, and layout testing

Expected page count: **10**

1. Text Extraction Test

The quick brown fox jumps over the lazy dog. This sentence is useful for testing common character rendering.

This paragraph contains dates, quantities, punctuation, and ordinary prose. Test date: 30 September 2026.

Quantity: 1,024 units. Ratio: 3:2. Status: Ready.

Check	Expected
Total pages	10
Page numbering	1 through 10
Tables	Present on multiple pages
Unicode	Present
Nested table	Present
Long text	Present

Final test string: ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 0123456789 © ® ™ ✓ → ■
€ £ \$

2. Basic Table Test

The table below tests column alignment, row boundaries, numeric values, and text wrapping.

ID	Category	Quantity	Unit Price
A-001	Hardware	12	■1,250.00
A-002	Software	7	■875.50
A-003	Services	24	■2,400.00
A-004	Training	3	■5,750.00

3. Nested Table Test

This page contains a table with another table embedded inside one of its cells.

Group	Description	Nested Records	
A	Contains a nested table.		
		Code	Detail
		N-01	Alpha
		N-02	Beta
		N-03	Gamma
B	Ordinary content.	B-01 Delta; B-02 Epsilon	

4. Lists and Hierarchy

Nested lists can reveal whether extraction systems understand indentation and hierarchy.

- 1 Document processing
 - 2 Image and text handling
 - 3 Structured data extraction
- Sub-point ✓ 12345 • A-17 • Test

5. Special Characters and Unicode

Use this page to check whether PDF viewers and extraction tools preserve characters outside basic ASCII.

Type	Examples
Currency	■ \$ € £ ¥
Math	± × ÷ = ≠ ≤ ≥ √ ∑ ∞
Symbols	© ® ™ ✓ ★ → ← ↑ ↓ • ...
Accented	café, naïve, résumé, jalapeño
Greek	α β γ Δ Ω π λ

6. Long Paragraph and Wrapping

This page contains deliberately longer prose to test line wrapping and reading order.

Paragraph 1: Document processing systems often need to identify relationships between headings, paragraphs, tables, and page boundaries. A robust extraction workflow should preserve sequence without duplicated text. This deliberately long paragraph wraps across several lines and includes numbers such as 42 and 2026.

Paragraph 2: Document processing systems often need to identify relationships between headings, paragraphs, tables, and page boundaries. A robust extraction workflow should preserve sequence without duplicated text. This deliberately long paragraph wraps across several lines and includes numbers such as 42 and 2026.

Paragraph 3: Document processing systems often need to identify relationships between headings, paragraphs, tables, and page boundaries. A robust extraction workflow should preserve sequence without duplicated text. This deliberately long paragraph wraps across several lines and includes numbers such as 42 and 2026.

Paragraph 4: Document processing systems often need to identify relationships between headings, paragraphs, tables, and page boundaries. A robust extraction workflow should preserve sequence without duplicated text. This deliberately long paragraph wraps across several lines and includes numbers such as 42 and 2026.

7. Repeated Data Records

Repeated rows are useful for testing extraction consistency and detecting missing or duplicated records.

Record	Name	Region	Score	Date
R-1001	North	US	65	2026-01-15
R-1002	South	EU	70	2026-02-15
R-1003	East	APAC	75	2026-03-15
R-1004	West	IN	80	2026-04-15
R-1005	Central	US	85	2026-05-15
R-1006	Coastal	EU	90	2026-06-15
R-1007	Metro	APAC	95	2026-07-15
R-1008	Rural	IN	100	2026-08-15

8. Form-Like Layout

This page simulates a simple form without interactive fields.

Field	Value
Full Name	Test User
Reference ID	TEST-2026-009
Department	Quality Assurance
Priority	Medium
Description	Sample content used to test multi-line values and wrapping.
Approved	☒ Yes ☐ No

9. Final Validation

Use this page to perform an end-to-end validation of the generated PDF.

Check	Expected
Total pages	10
Page numbering	1 through 10
Tables	Present on multiple pages
Unicode	Present
Nested table	Present
Long text	Present

Final test string: ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 0123456789 © ® ™ ✓ → ■
€ £ \$
