

Regional Sales & Inventory Briefing

This briefing consolidates sales performance and inventory status across three regional warehouses for the third quarter. Overall sell-through improved compared to Q2, though inventory turnover varied significantly by region. Details are broken down below by sales figures and current stock levels.

Regional Sales Figures

Region	Q2 Sales	Q3 Sales	Growth
North	\$412,000	\$468,500	+13.7%
South	\$298,000	\$305,200	+2.4%
West	\$355,000	\$389,900	+9.8%

The North region's strong growth was driven largely by a promotional campaign launched in August, which is expected to continue through Q4. South's flatter performance is attributed to a temporary staffing shortage at the regional distribution center, which has since been resolved. Inventory levels for key SKUs are shown in the table below, along with reorder thresholds.

Current Inventory Status

SKU	Description	On Hand	Reorder Level	Status
WH-1042	Insulated Shipping Box	1,240	500	OK
WH-1088	Pallet Strapping Kit	180	300	Reorder
WH-1103	Thermal Label Rolls	2,050	800	OK
WH-1150	Loading Dock Bumper	45	50	Reorder

Two SKUs — Pallet Strapping Kit and Loading Dock Bumper — have fallen below their reorder thresholds and purchase orders are being prepared this week. No stockout risk is anticipated for either item based on current usage rates. All other tracked SKUs remain within normal operating range heading into Q4.
