

Product Analytics Overview

This report covers user growth and engagement for the product over the last five months. Monthly active users have grown steadily, with the largest jump occurring between March and April following the release of the mobile app redesign.

Monthly Active Users

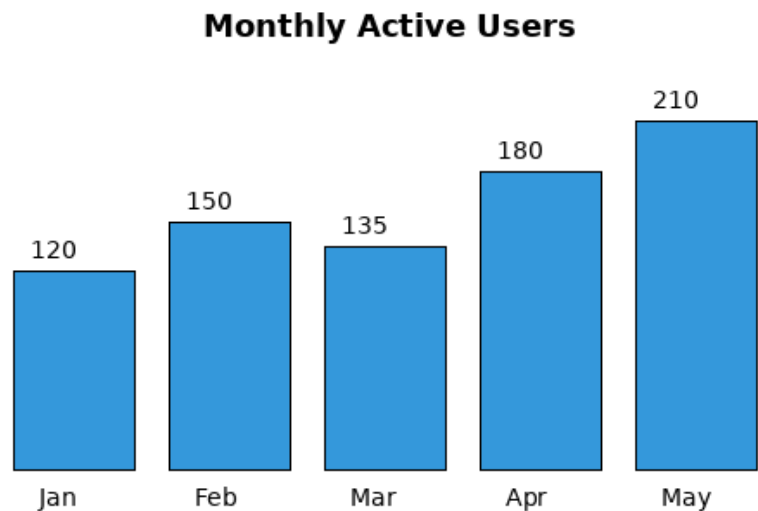

Figure 1: Active users by month, in thousands

Retention also improved during this period, with week-4 retention rising from 38% in January to 47% in May.

Regional Breakdown

The table below breaks down active users by region for the most recent month. North America and Europe together account for the majority of the user base.

Region	Active Users	% of Total	MoM Change
North America	84,200	40%	+6%
Europe	63,500	30%	+4%
Asia Pacific	42,000	20%	+9%
Rest of World	21,000	10%	+2%

Asia Pacific showed the fastest month-over-month growth at 9%, suggesting continued investment in that region is likely to pay off over the next two quarters.
