

Team Performance Snapshot

This snapshot covers key delivery metrics for the engineering team over the past sprint. Velocity held steady while bug resolution time improved noticeably, as shown in the chart below.

Bug Resolution Time (days)

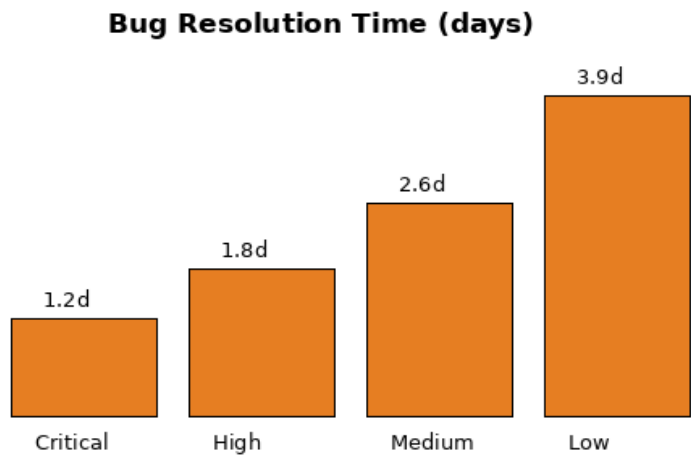

Figure 1: Average resolution time by issue category

Sprint Summary

Metric	Last Sprint	This Sprint	Change
Story Points Completed	42	45	+7%
Bugs Resolved	18	24	+33%
Avg Resolution Time	3.2 days	2.1 days	-34%
Open Pull Requests	9	6	-33%

The drop in average resolution time is attributed to the new triage process introduced two weeks ago. The team plans to continue this process into the next sprint and revisit the metrics at that point.
